DETAILED ACTION

Allowable Subject Matter

1. Claims 9-20 allowed.
2. Claims 4-8 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3 rejected under 35 U.S.C. 103(a) as being unpatentable over Yokouchi et al. (5,973,339) in view of Davids et al. (2003/0161571).

Regarding Claims 1-3, Yokouchi et al. disclose a semiconductor photodetector having an optical attenuator where in Fig. 2, layer 30 is InP substrate, layer 11 is optical absorption layer and layer 21 is attenuator layer. Incident light 40 is attenuated by the left half attenuation section 20 and passed onto right half photosensitive section. Yokouchi et al. fail to disclose the required relationship between the attenuating layer and the detecting layer. However, Davids et al. disclose an integrated photodevice and waveguide where in Fig. 6A, attenuation layer 18 is between detecting layer 12 and waveguide 28.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required relationship between the attenuation layer and the detection layer in order to have an optical photodevice with better performance.
